

JRHT Sustainability Policy

We consider the impact of all our actions on people and the environment and are committed to sustainable communities, services and development.

Defining Sustainability

When we talk about sustainability, we mean:

- Social sustainability (affecting people and communities)
- Economic sustainability (financial viability and value for money)
- Environmental sustainability (our impact on the environment)

Our commitment to sustainability involves:

Workplace - Our People

- We will monitor and seek to reduce our energy and water use
- We are committed to reducing pollution and use of resources
- We will reduce, reuse and recycle
- We will offer incentives for staff and residents to use sustainable transport
- We will communicate honestly and openly across the organisation
- All staff will attend equality and diversity workshops
- All staff will attend sustainability workshops

Communities - Our Residents and Our Partners

- We will engage with our communities
- We will encourage and enable our communities to reduce, reuse and recycle
- We are committed to building and maintaining sustainable and affordable homes through responsible procurement
- We are committed to demonstrating and sharing best practice
- We are committed to creating green and sustainable communities with our residents
- We acknowledge that we are accountable to our residents, partners and other stakeholders and we will share our progress regularly
